OBJECTIVE

A highly skilled and motivated Java Developer with more than 12 years of experience in designing, developing, and maintaining Java-based applications. Seeking a challenging position where I can utilize my expertise in Java programming, software development, and problem solving to contribute to success of company by delivering efficient, scalable and high quality software solutions.

SKILLS

- Core Java
- Spring Boot
- Microservice
- RDBMS
- Web Service development
- AJAX and JSON
- Kafka messaging system for inter service communications.
- Deployment using Kubernetes and Docker.

INTERESTS

- Microservice development using Spring Boot.

LANGUAGE

- English
- Hindi
- Konkani
- Marathi

EXPERIENCE

**10th Feb 2014 -
Till Present**

Infosys

Technology Lead

Responsible for understanding and implementing microservice architecture principles.
Involved in design, develop and maintain individual microservices using Spring boot and Dropwizard framework. Designed and documented APIs that allows services to communicate with each other and with external systems. Involved in scaling of microservices to handle varying loads. Involved in implementation of fault tolerance and error handling mechanisms.
Worked on docker and kubernetes for containerisation and orchestration.
Conducted Junit5 testing for microservices to ensure its functionality.
Worked on authentication and authorisation microservices for to ensure security.
Implemented CI/CD pipelines for automating deployment process.

**1st Feb 2013 -
5th Feb 2014**

Times Technologies

Java Developer

Build various independent and isolated components for building complex user interface using JavaScript Frameworks.

**2nd March 2011 -
7th Nov 2012**

Torry Harris

Associate Software Engineer

Worked as Java Developer analyzing and fixing bugs for Europe based mobile company and Japanese based e-commerce applications.

EDUCATION

2008

Goa University

B.E(Electronics and Telecommunication)
65%

PROJECTS

Allstate Application Development(Sept 2018 till Present)

Responsible for Coding, testing, debugging, implementing, and support complex insurance products.

BT project (Feb 2017 to August 2018)

Developed web services for BT project.

Code, test, debug, implement, and support complex Vehicle management system.

MyRICOH project(Nov 2015 till Jan 2017)

Application development for MyRicoh website.

Code, test, debug, implement, and support MyRicoh website for ordering Ricoh products, browsing the catalog, selecting the quantity of Ricoh printers and checking out to payment page and finally submitting with review.

Loan Origination System for PMI client(Feb 2014 till Oct 2015)

Code, test, debug, implement, and support eOrigination system for PMI client where user can apply for Loan and it can be either accepted or rejected by system depending on criteria.
